EDUARD ACEVEDO

COMPUTER ENGINEER

EXPERIENCE

Kubbesa (Aug 2022 - Present)
FullStack Developer
Fintech Crediviva:

- Developed **Fintech Crediviva**, a Flutter mobile app that allows users to apply for credits in affiliated stores, improving accessibility and transaction efficiency.
- Built the **BackOffice system** using React and TypeScript, optimizing credit control and company administration.
- Designed and implemented the **backend using AWS Lambda functions** and MongoDB, ensuring a scalable and cost-effective infrastructure.
- Worked with **Flutter, Node.js, NestJs, MySQL, TypeScript, React, and Next.js** to deliver a robust financial solution.

BuddyBet (Australia) | Flutter Developer

- Developed the BuddyBet sports betting app, allowing friends to challenge each other on sports bets, with user validation and gamification mechanics that increased user retention.
- Used Flutter and Riverpod for efficient state management, ensuring a seamless and responsive user experience.
- Implemented unit tests with Mockito, improving business logic stability and reducing bugs in production.
- Contributed to building a Design System of reusable components, ensuring visual consistency across the app.
- Technologies: **Flutter, Riverpod, Mockito.**

Miami Never Sleep

- Maintained and developed new services in the REST API built with Node.js, Express, and TypeScript, improving the management of a CRM for ticket sales and event publishing.
- Optimized data models and API performance, enhancing ticket transactions and system reliability.
- Used PostgreSQL and Prisma for efficient data storage and retrieval.
- Technologies: **Node.js, Express, PostgreSQL, Prisma, NestJS.**

Componente Serviex Jul 2021 - Jan 2023
Developer FullStack - Flutter / Laravel / Node
Mobile Cheff | Full Stack Developer

- Developed a digital application for recipe sharing and grocery shopping, allowing users to purchase products directly from supermarkets via the app.
- Built the **backend API using Laravel and MySQL**, integrating social media-style features like video posts, likes, comments, and targeted advertising.
- Ensured a seamless user experience by implementing a responsive UI with Flutter.
- Technologies: **Flutter, Laravel, MySQL.**

CLAIN ABIF 2022 | Full Stack Developer

- Developed a ticket purchasing system using Laravel, Vue.js, and MySQL, optimizing the stock management and approval process for in-person tickets.
- Integrated a Chilean payment gateway, ensuring secure and efficient transactions.
- Designed a responsive UI with Bootstrap, improving accessibility and user interaction.
- Technologies: **Laravel, Vue.js, MySQL, Bootstrap.**

SocialFit | Mobile Developer

- Developed SocialFit, a social network app for gyms in Bogotá, allowing users to share photos, videos, post likes, and comments.
- Built the backend using Node.js and NestJS, ensuring a scalable and high-performance infrastructure.
- Implemented Firebase for real-time data synchronization, improving app responsiveness.
- Technologies: **Node.js, NestJS, Flutter, Firebase**.

Grupo Jurídico DEUDU Oct 20 - Jun 21
Developer FullStack - Laravel / Node
Full Stack Developer

- Developed **Aquila 3**, a **CRM for portfolio recovery and debtor management**, optimizing the tracking and collection process.
- Implemented a **call integration feature**, allowing call center agents to contact debtors directly from the platform.

SKILLS

Backend

- Node.js (5+ years)
- TypeScript (4+ years)
- Express.js (4+ years)
- NestJS (2+ years)
- Laravel (4+ years)
- Microservices (1+ years)

Mobile

- Flutter (4+ years)

Frontend

- React (3+ years)
- Next.js (2+ years)
- Vue.js (2+ years)

Bases de Datos

- MySQL (6+ years)
- SQL Server (3+ years)
- PostgreSQL (3+ years)
- MongoDB (4+ years)

Herramientas & DevOps

- Git (5+ years)
- Docker (1+ years)
- AWS (3+ years)

- Designed a system for **payment history tracking and customer data management**, improving efficiency in debt monitoring.
- Built the platform with a **responsive UI using Bootstrap and Vue.js**, ensuring a seamless user experience.
- Technologies: **Laravel, Bootstrap, MySQL, jQuery, Vue.js, Express.js.**

Avanx, Jun 21 - Jul 21 mod Collaborator

Mobile developer - Flutter

Avanx | Mobile Developer
- Developed **new functionalities** for the **Avanx mobile app**, a platform focused on **personal growth, financial liberation, and independence**.
- Contributed to enhancing the **user experience and app performance** using Flutter and Dart.
- Collaborated with the **Izeven Group** to align development with the platform's educational goals.
- Technologies: **Dart, Flutter.**

JIACP Feb 2021 - Mar 2021 Collaborator

Developer FullStack - Flutter / NodeJs

JIACP - Legal App | Full Stack Developer
- Developed **new functionalities** for **JIACP**, a **legal consultation app** that allows users to verify the status of legal processes and documents.
- Built and optimized the **backend API with Node.js, Express.js, and MongoDB** to store legal process data after retrieval.
- Integrated **external judicial process APIs** to enable real-time legal status verification.
- Implemented **push notifications with Firebase**, ensuring users receive timely updates on case progress.
- Technologies: **Flutter, Node.js, Express.js, MongoDB, Firebase**.

Hidramar Sep 20 - Feb 21 Freelance

Developer FullStack - Laravel / Javascript

CRM for Budget & Project Management | Full Stack Developer
- Designed and developed a **CRM system** to manage **budgets, new projects, user administration, and machinery loans**.
- Implemented **business logic with Laravel**, ensuring efficient data handling and process automation.
- Developed **activity reports and statistics dashboards** to provide insights into company operations.
- Built a **responsive UI with Vue.js and Bootstrap**, enhancing user experience and usability.
- Technologies: **Laravel, Vue.js, Bootstrap, MySQL, jQuery**.

Tedesco DEV - Feb 20 - Jan 21 Collaborator

FullStack NodeJs

Natural Space | Full Stack Developer
- Developed a **logistics management system** to handle **product requests** from multiple branches to the headquarters.
- Implemented **backend in Node.js and Express**, managing product requests, quantities, and store responsibility.
- Built a **frontend with Vue.js and Bootstrap**, ensuring a user-friendly interface for tracking deliveries by sector and branch.
- Integrated **MongoDB for data storage**, optimizing product request tracking and management.
- Technologies: **Node.js, Express.js, MongoDB, Vue.js, Bootstrap**.

Rent Car Valencia | Full Stack Developer
- Developed a **vehicle rental system**, allowing users to request rentals and process payments via an online gateway.
- Integrated optional add-ons such as child seats and additional vehicle accessories.
- Built the **backend API with Node.js and Express**, ensuring secure and efficient booking transactions.
- Designed the **frontend with React**, providing an intuitive user experience for vehicle selection and booking.
- Implemented **MySQL with Prisma for relational data management and optimized queries**.
- Technologies: **Node.js, Express.js, React, MySQL, Prisma, Bootstrap.**

No Más Colillas Uruguay | Full Stack Developer (In Development)

- Developing a **platform for environmental awareness**, displaying **containers, affiliates, and active collaborators** in Montevideo.
- Implementing **backend with Node.js**, providing efficient data handling and API services.
- Building **frontend with Vue.js**, ensuring an intuitive user experience for tracking locations and affiliations.
- Utilizing **MongoDB for scalable data storage**, managing real-time updates on collaborators and container locations.
- Technologies: **Node.js, Vue.js, MongoDB**.

DuxlinkHealth Feb 2019 - Sep 2020 mod LongTerm

Developer FullStack - PHP

Patient Administration & Home Health Care System | Full Stack Developer

- Developed **new functionalities** to enhance patient management and home health care administration.
- Implemented **improvements in patient records, appointment scheduling, and medical history tracking**.
- Enhanced **user interface with Bootstrap and jQuery**, ensuring better usability for healthcare professionals.
- Optimized **database management with MySQL**, improving data retrieval and system performance.
- Technologies: **PHP, Bootstrap, MySQL, jQuery**.

LinkTic Sep 18 - Apr 19 mod LongTerm

Developer FullStack - PHP

Tourism Certification System | Full Stack Developer

- Provided **support and continuous development** of new functionalities for the **tourism certification system** used by service providers.
- Implemented **enhancements in the certification process**, improving the validation and approval workflow.
- Developed **new administrative tools** for managing service providers and their certification status.
- Optimized **data storage and retrieval in MySQL**, ensuring efficiency and scalability.
- Built **frontend components with Vue.js and Bootstrap**, improving user experience and responsiveness.
- Technologies: **Laravel, Node.js, Vue.js, Bootstrap, MySQL, jQuery**.

Ninja Software Factory Nov 17 - Jul 19 LongTerm

Developer Backend

Share Festival Barcelona & Fundación Celta | Backend Developer

- Developed **REST APIs** to support event management and operations for **Share Festival Barcelona**.
- Built **core API foundations** for **Fundación Celta**, ensuring scalability and maintainability.
- Designed and optimized **database schemas** in MySQL for efficient data handling.
- Integrated **Laravel and Node.js with Express**, improving API performance and security.
- Technologies: **Laravel, Node.js, Express, MySQL**.

Metro IT Service Apr 15 - nov 17 mod LongTerm

Developer Laravel - Fullstack

Metro Gestión System | Full Stack Developer

- Developed and maintained **Metro Gestión**, an internal management system for **ISP Gandalf Communications**.
- Implemented **features for network infrastructure management**, customer service tracking, and operational efficiency.
- Optimized **database performance in MySQL**, ensuring fast and reliable data processing.
- Built **frontend components with Bootstrap and jQuery**, improving usability and responsiveness.
- Technologies: **Laravel, Bootstrap, MySQL, JavaScript, jQuery**.

Autoenlace | Full Stack Developer

- Designed and developed **Autoenlace**, a system for managing spare parts offers for customers.
- Implemented **pricing and availability tracking**, allowing users to browse and request parts efficiently.
- Developed **custom business logic** for offer calculations and automated customer notifications.
- Technologies: **Laravel, Bootstrap, MySQL, JavaScript, jQuery**.
